Projects | https://github.com/safegergis

BETA BIOMED WEBSITE | https://betabiomed.com

- Leveraged Nuxt to build a lightning-fast and SEO-optimized frontend, harnessing its server-side rendering capabilities
- Built a dynamic and engaging user interface with Vue.js, crafting reusable components and managing state efficiently for a seamless user experience.
- Crafted a performant Node.js API that seamlessly integrates with the Nuxt.js frontend, ensuring smooth data flow and a snappy user experience.

DEMO CHURCH WEBSITE

- Developed and deployed a dynamic church website using Django and Bootstrap, showcasing expertise in full-stack web development, database modeling, and responsive design principles.
- Successfully integrated real-time Twitter feeds into the website using Python's Tweepy library, demonstrating proficiency in API integration and OAuth authentication.
- Leveraged version control with Git, managed deployment on platforms like Heroku, and implemented SEO best practices, showcasing comprehensive web development and project management skills.

Experience

MEDTEN | IRVINE, CA | JR. FULLSTACK ENGINEER | MAY 2023 – CURRENT

- Redeveloped the Beta Biomed website using Nuxt.js, resulting in a faster, more SEO-friendly, and user-engaging platform.
- Actively contributing to the ongoing migration of the online product catalog to Nuxt.js, modernizing the system and improving its maintainability.
- Involved in the migration of the database UI to Nuxt.js, streamlining data management and interaction.
- Playing a crucial role in translating existing components to the new Nuxt.js framework, ensuring a smooth transition and minimizing disruptions.
- Maintaining and managing images and data across various projects, ensuring consistency and data integrity.

BEST BUY| IRVINE, CA | CONSULTATION AGENT | NOV 2022 – CURRENT

- Utilized technical expertise to diagnose and repair customer devices, ensuring timely and effective solutions.
- Assist elderly and less technically inclined customers in operating their devices (smartphones, tablets, computers, etc) safely and correctly.
- Utilized exceptional interpersonal skills to build trust and rapport with customers, resulting in increased repair revenue through the upselling of additional services and products.

COMPTIA| DOWNERS GROVE, IL | INFORMATION SECURITY INTERN| JUNE 2020 – AUGUST 2020

- Developed an accessible and user-friendly course that enables learners to pass CompTIA A+ certification with ease.
- Gained valuable industry experience and knowledge by interning at CompTIA, a global leader in IT certifications and technology advocacy.

Education

California State University Fullerton - Computer Science B.S. | EXPECTED GRADUATION – MAY 2026
